Embedded SW and FPGA articles and presentations

[Virtual Machines for embedded software development](#)

Using a virtual machine (VM) as a development platform for embedded software has many advantages. VMs enable better portability, greater redundancy, lower setup- and recovery times. [More](#)

[7 articles and presentations on FPGA and general development released](#)

See our overview of articles and presentations that we have held at various seminars since Jan. 2012. They are all equally relevant today.
We will put more articles and presentations there soon.

Seminars and Events

- 20. May 2014 [NI: Hands-on Embedded Systems 2014 \(May 13 & 20\)](#)
- 22. May 2014 [Matlab Expo 2014 - Nordic](#)
- 02. Jun 2014 [NDC 2014 - Norwegian Developers Conference](#)
- 03. Jun 2014 [Arrow Technology Seminar & Boat Trip Event 2014](#)
- 11. Jun 2014 [NI: Build Your Own Embedded System Workshop](#)
- 09. Sep 2014 [FPGAworld](#)
- 10. Feb 2015 [FPGA-forum workshops](#)
- 11-12 Feb 2015 [FPGA-forum](#)
